-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the color patterns being “soft”. The specification provides no guidance on what this term means. “soft” is relative and thus the claim is ambiguous.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by USPN 6,668,751 to Henke.
4. Henke teaches a tool coating with colored patterns comprising:

Art Unit: 1774

a tool coating foundation having a surface (32, FIG. 2 and associated text, molded soft plastic); and at least one colored dye pattern layer being soft and pliable attached to the surface of the tool via a color adhesive strip (col. 4, lines 1-15, instant claim 1 is met).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over USPN 6,668,751 to Henke in view of USPN 6,726,868 to Panfili et al. as evidenced by USPN 5,516,143 to Lang et al.
6. Henke essentially teaches the claimed invention.
7. Henke does not teach a transparent film applied to the colored pattern.
8. Panfili teaches a tool comprising: a handle (7, Fig. 5 and associated text) having a first color pattern thereon (1, Fig. 5 and associated text); and a protective cover (3, Fig. 5 and associated text) of molten resin injection molded polypropylene or Santoprene® thermoplastic elastomer, (col. 4, lines 25-38, col. 5, lines 14-16) completely exhibiting a portion of the first color pattern enclosed therein. Panfili teaches the cover is of Santoprene® but does not refer to it as transparent. Lang is used to show evidence of molded Santoprene® that is a transparent plastic (col. 2, lines 57-63 of Lang).

Art Unit: 1774

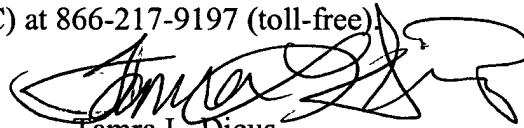

9. It would have been obvious to one having ordinary skill in the art to have modified the tool of Henke to include a transparent film applied to the colored patterns of Henke because Panfili teaches a tool having colored patterns having a protective cover of Santoprene® thermoplastic elastomer (col. 4, lines 25-38, col. 5, lines 14-16 of Panfili) and Lang is used to show evidence of molded Santoprene being transparent (col. 2, lines 57-63 of Lang). The combination would act to protect the color pattern from being damaged.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tamra L. Dicus whose telephone number is 571-272-1519. The examiner can normally be reached on Monday-Friday, 7:00-4:30 p.m., alternate Fridays.
